

**ANN TEDFORD**  
**Manager, Chief System Engineer Group**  
**NextGen and Operations Planning**

Ann Tedford is currently the manager of the FAA's NextGen Planning Group which is responsible for enterprise-wide system engineering and performance management for the NextGen portfolio, publishing and maintaining the NextGen Implementation Plan, and stakeholder outreach. In 2006 she was the FAA's liaison officer to the Deutsche Flugsicherung (DFS), the German air navigation service provider.

She received her Bachelor of Science in Systems Engineering from Boston University. Prior to joining the FAA in 1990, she worked for Boeing on automatic flight control systems and for Martin Marietta on the FAA's System Engineering and Integration contract. Some of the programs Ms. Tedford has contributed to include: the Host Computer System, the Advanced Automation System, the Display System Replacement, Automatic Dependent Surveillance-Broadcast, and the NAS Enterprise Architecture.
